

Algebra II Pre-AP  
Test #2F-19 Remediation and Retesting Guidelines

- 1) If you have any zeros on homework (Assignments #53 - 58 inclusive) then you are not eligible for remediation or retesting. All homework zeros must be cleared BEFORE testing begins.
- 2) If you scored below 70, have submitted all assignments, and wish to improve your grade, you must first rework all missed test questions **in detail** and submit them to me no later than **12:00 noon on Thursday, May 16, 2019**.
  - a) Reworked problems must show all necessary steps and must include a brief explanation of why you lost points on that particular problem.
  - b) Reworked problems must be legible and well-organized,
  - c) Minor mistakes such as omitting units need not be reworked entirely. An explanatory sentence will suffice.
  - d) Test corrections must be checked and cleared by me before they will be accepted. Problems that are not correctly fixed must then be re-worked and resubmitted. All problems must be correctly re-worked no later than **12:00 noon on Thursday, May 16**. It is the student's responsibility to check with the teacher to verify the status of corrections and to allow sufficient time for this to take place.
- 3) If you scored below 65, then in addition to reworking missed problems as per point 2) above, you must also complete a retest of all missed problems at a time when I am available no later than **12:00 noon on Friday, May 17, 2019**. **IT IS STILL NECESSARY TO GET YOUR CORRECTIONS CHECKED BY YOUR TEACHER!** Therefore, do NOT wait until the last day to submit your corrections.

Deadlines

Date	Who	Task
Thursday 5/16, 12:00 noon	All students who scored below 70	All problems missed on the test must be corrected. Those corrections must be checked by me, and any further work necessary to complete the corrections process must be finished and submitted to me.
Friday 5/17, 12:00 noon	Students who scored below 65	Retest over problems missed must be completed.
